

## LANE REDUCTIONS, RAMP CLOSURES AT PICO

Intermittent lane reductions and ramp closures at Avenida Pico will continue this week as crews install traffic loops in the roadway. Also, crews will begin constructing median islands on Pico. Here's what to expect:

**WHEN: Nightly, 11 p.m. - 5 a.m. Monday, Nov. 13, through Friday, Nov. 17.**

**WHAT:** Northbound and southbound I-5 lane reductions, intermittent full closures of northbound and southbound on- and off-ramps at Pico, and intermittent lane reductions in each direction on Pico.

Use Calle Frontera, Avenida Vista Hermosa and Avenida Palizada as detours.

Daytime irrigation work and planting also will continue on the freeway and on Pico.

## WEEKEND RAMP CLOSURES IN DECEMBER

A full weekend closure of the southbound and northbound I-5 on- and off-ramps at Pico is planned for early December. The extended closure will allow crews to place the final cap of asphalt paving on the ramps. More information will be provided in future construction alert emails.

## I-5 AT AVENIDA PICO

Over the past several weeks, crews have completed initial paving on I-5 at Pico, and motorists have been shifted onto these new portions of the freeway. A recent aerial photo shows the new traffic patterns.
