Introduction

The Revenue Handbook is a comprehensive guide to the City’s major sources of revenue. The handbook provides information on most revenues from the General Fund and other funds. The major revenue line items are listed individually, while some smaller line items which are similar in nature have been consolidated. Within the Revenue Handbook, two pages have been devoted to each listing. The first page consists of background information, and the second page contains historical data.

Background Information

The Revenue Handbook includes background information on each revenue source, including account number, legal authorization, and a brief description. The location, exact source, timing of receipts, any pertinent fee schedules or calculations and an overview are also provided.

Historical Data

Historical data on each revenue source has been illustrated in two charts. The first provides figures for receipts over the past five completed fiscal years. The second provides monthly figures for the most recent completed fiscal year. For some revenue sources, the monthly chart includes a thirteenth column, representing accruals. This column, labeled 13, recognizes revenue earned in that period which was actually received by the City at a later time. Refunds or adjustments in excess of the amount received within the period will be reflected as a negative amount.

Beginning in FY 2005, cities received the 0.67% portion of the motor vehicle fee directly from the State. The balance of the 2% to 0.67% VLF fee reduction comes from an allocation of Educational Relief Augmentation Fund (ERAF) property taxes. All growth in assessed valuation go to the cities.

Single Family properties in excess of 7,000 square feet can apply for a large lot classification, which provides more water unit allocations in Tiers 1 and 2 than single family lots under 7,000 square feet in size. Since water rates are tiered to promote water conservation, customers with large lots would be unjustly penalized without the increased allotments. Water allocations are different for winter and summer months. The table below provides the allocations, by tier, for winter and summer months under the large lot classification:

Fee Schedule: Based on an administrative cost allocation plan that is prepared annually.
Use of Revenue: Unrestricted.
Last Fee Update: Updated annually in June based on the cost of providing services.
Last Fee Review: June, 2009

Overview

Charges are made from the General Fund to other funds in order to recover all administrative costs of providing services to the non-administrative (operating) programs within the City. Administrative programs include City Council, City Manager, City General, Finance & Administrative Services, City Clerk, Human Resources and Finance. The City utilizes direct and indirect charges to calculate appropriate charges to other funds. Direct charges are those which can be specifically identified with a particular service. An example of this would be Utility Billing personnel within the Finance Division charging a percentage of their time directly to the Water Fund and Sewer Fund for processing utility bills, and providing the related customer service. Indirect costs are not readily identifiable with a particular operating program, but rather are incurred for a joint purpose which benefits more than one cost objective. These costs are charged indirectly by means of an equitable methodology. For example, the City Clerk’s Department is charged to all operating programs based upon the total number of agenda items prepared for each program through a rolling average of the previous 36 months. Payroll costs are charged to operating programs based upon the number of active employees in each program. Financial planning (budget) costs are charged based upon the number of programs for the previous year. Project Accounting costs are allocated based on the number of open project accounting work orders.

Description: Tax imposed on the total retail price of any tangible personal property, unless specifically exempted.

Received From: State Board of Equalization.

Received By: Finance and Administrative Services Department, Finance Division.

Receipt Timing: Revenues are received monthly from the State. Because revenues lag behind retail sales up to three months, a large portion of this revenue is shown in the accrual column (13) of the monthly revenue chart.

Fee Schedule: The City receives 1% of total retail sales within the City of San Clemente. The rest of the 7.75% of total retail sales goes to the State and the County.

Use of Revenue: Unrestricted.

Last Fee Update: March, 2004

Last Fee Review N/A

Overview

The City receives a portion of the tax that retailers add on to the price of most goods purchased in the State of California. The state currently collects 8.75% and remits 1% back to the City, through the County. The sales tax is imposed on retailers for the privilege of selling tangible personal property. Tangible personal property is any material asset, such as household goods or business equipment, which is not permanently attached to real property (such as land or buildings). Resale and wholesale sales are excluded from the tax, as well as the cost of professional services, food, and prescription medicine. Sales tax makes up 11% of total General Fund revenue.

In March 2004, California voters approved a financing bond measure to partially offset the State’s budget deficit. The financing mechanism, commonly known as the “triple-flip”, diverts 25% of local sales taxes to the State to be used as security for “Economic Recovery Bonds”. The State is replacing the 25% in “dollar for dollar” property tax revenues from County ERAF funds.

Revenue from the In-Lieu Sales Tax amounts to $1.1 million for FY 2010.

**Overview**

The Public Safety Sales Tax Augmentation represents an additional .5% retail sales tax to be allocated for public safety purposes. Proposition 172, the ballot initiative which imposed this tax, was enacted in November 1993. This revenue goes to the County, based on the County’s share of total statewide sales tax. Each County’s share is divided among the cities and the County based on their proportionate share of the net property tax losses resulting from the 1994 state budget. The City’s share is capped at 50% of the net property tax loss. AB 2788 requires all cities, regardless of whether they receive Proposition 172 funds, to fund public services at the fiscal year 1993 level.

Overview

The Motor Vehicle License Fee, sometimes referred to as Motor Vehicle In-Lieu Tax or “car tax”, is an annual fee equivalent to 0.65\% of the market value of vehicles licensed in the state. The fee is paid annually upon vehicle registration and funds city and county services.

Exemptions from this tax include government owned, diplomatic, civil air patrol, certain farm vehicles, vehicles owned by amputee veterans or the blind, and privately owned school buses.

Farm trailers, privately-owned firefighting vehicles and forklifts are exempt from vehicle registration and the VLF but are instead subject to property taxes.

Beginning in 1998, the State Legislature began a series of reduction in the VLF rate to the vehicle owner but continued to allocate funding to cities and counties at the 2\% of market value rate. The vehicle owner was assessed a fee equivalent to 0.65\% of market value and the State “backfilled” 1.35\% with other State revenue sources. Beginning in FY 2005, the State discontinued the “backfill” of vehicle license fees. The State now contributes an equivalent amount of State Educational Revenue Augmentation Fund (ERAF) property taxes to augment the loss of 1.35\% of vehicle license fees.

### Overview

Revenue is transferred from the Golf Fund to the General Fund to help maintain and support City recreation programs. Prior to 1997, the only direct golf course contribution to the general fund was an “in-lieu” (in-lieu of paying property taxes) fee. In February of 1997, the City Council voted to transfer funds to offset the negative impacts of Proposition 218. The City’s Golf Course is currently operated as an “enterprise” fund, separate from the General Fund. However, all other City recreation programs are funded from the General Fund.

Beginning in FY 2007, City Council has eliminated the $425,000 transfer from the Golf Fund to the General Fund to balance the Golf Operating Fund.

An administrative charge is added to the City billing. The charge is compiled by taking the cost of the various administrative services for both compliant and non-compliant properties, and dividing these equally among all lots. Admin fees fluctuate greatly based on the number of private properties cleared in any given year. Delinquent accounts are forwarded to the County Controller who attaches the debt to the owner’s property tax assessment.

Revenue Policy

City Council revised the fiscal policy relating to user fees and charges to the following:

“All General Fund user fees will be reviewed and adjusted annually as a part of the budget process by each City department and the analysis with recommended changes will be provided to the City Council. The basis for adjustment will be the cost of providing services, inflationary impacts, or other budgetary factors as appropriate. User fees will be established to recover the full cost of services provided, except when the City Council determines that a subsidy from the General Fund is in the public interest.”

To identify the basis of adjustment for all revenue sources, an adjustment table has been prepared. The table identifies seven different categories that are explained below:

- City will adjust annually by Consumer Price Index (CPI) – User fees in this category will be adjusted annually in January or July (as set by ordinance or resolution) to ensure that the fees fully recover the cost of providing the service.
- City will review fee or charge every five years – Every five years, a cost of service study will be performed on certain fees or charges to determine if the fee or charge fully recovers the cost of providing City services.
- Fee or charge set by contract – Certain fees or charges are determined by negotiated contract. The fees or charges will be adjusted based on the conditions of the contract.
- Fee or charge fully recovers the cost of service – A cost of service analysis is performed on all City fees and charges to determine the cost of providing the service. The City desires to achieve fully cost recover on all services whenever possible.
- Changes to fee or charge subject to Proposition 218 – Proposition 218 is a statewide initiative passed by the voters of California in 1996. The initiative provides voters with the right to vote on all new taxes or changes to existing taxes. Voters must pass any new or revised taxes by either a simple majority or by two thirds plus one of the registered voters.
- Fee or charge subsidized for public benefit – Certain fees or charges have been designated “subsidized for public benefit” by City Council and do not recover the full cost of providing City services. Examples include youth sport activities, cultural heritage permit designations and other recreational or planning efforts that provide a benefit to the community.
Revenue Policy

- City allocation determined by Federal, State or County governments – The allocation amounts for certain taxes, fees and charges is outside the City’s control and set by other governmental agencies. Allocation formulas are typically set to provide equity for all parties.

The Revenue Updates schedule provides a detailed listing of the last time the revenue source was updated or changed by the City.
