BULKY ITEMS, ELECTRONIC WASTE, & WHITE GOODS

Items that cannot properly fit in your bin, such as a chair or desk, are considered bulky items and require a special pick up. Electronic waste [e-Waste] is anything with a circuit board or battery, such as computers, telephones and small printers. White goods [e.g. refrigerators, freezers] and electronic waste cannot be disposed of in your bin. CR&R will collect and properly recycle these items. These services are provided on an on call basis.

HAZARDOUS WASTE

Hazardous wastes are products that are flammable, corrosive, reactive or toxic. They are dangerous to the public and the environment. It is illegal to dispose of hazardous wastes in your CR&R containers. Hazardous wastes must be disposed of properly. For further information about the disposal of hazardous waste, please visit oclandfills.com.

the face of a greener generation

SAVINGS

Recycling is not only good for the environment, it can be great for you bottom line too! CR&R provides recycling bins at a nominal charge. By exchanging a trash bin with a recycle bin, your monthly bill may be significantly reduced. Let us show you how to better manage your waste stream and put money back in your business and not in your trash bin.

GETTING STARTED

CR&R will work with your business to determine the types of materials you generate and structure a program using the space you have available in and around your office for collection.

TRAINING / ASSISTANCE

Once your business decides to implement a program, CR&R's Sustainability Specialist will assist in the training of your employees. We'll provide educational materials explaining the program in depth. One of the keys to a successful program is education, from the executive management to the janitorial staff.

CUSTOMIZED PROGRAMS

CR&R offers waste audits for businesses seeking to improve their current recycling and waste programs. A CR&R Sustainability Specialist will evaluate your waste stream from the inside out to achieve the most successful recycling program possible. For additional information, please call customer service.

RECYCLING LEGISLATION

Assembly Bill 939 [AB 939]
Required jurisdictions to meet diversion goals of 25% by 1995 and 50% by the year 2000 resulting in the implementation of:

- Drop-off recycling programs
- Curbside recycling
- Commercial recycling
- Construction and demolition recycling

Assembly Bill 341 [AB 341]
requires all jurisdictions to meet the diversion goal of 75% by 2020 resulting in businesses who generate 4 or more cubic yards of waste to either:

- Participate in a recycling program with their local waste hauler.
- Donate, sell and/or self-haul materials to a recycling facility.

Information about California's business recycling requirements is available from the California Department of Resources Recycling and Recovery [CalRecycle] at <http://www.calrecycle.ca.gov/recycle/commercial/>.

Assembly Bill 1826 [AB 1826]
will require businesses to separate their food scraps and green waste for recycling. AB 1826 builds on the success of the mandatory commercial recycling program established by AB 341. Please see the timeline below for implementation requirements:

- 2016 – All businesses with 8 or more yards of organic waste per week
- 2017 – All businesses with 4 or more yards of organic waste per week
- 2019– All businesses with 4 or more yards of solid waste per week

Information about organic waste recycling requirements is available from the California Department of Resources Recycling and Recovery [CalRecycle] at <http://www.calrecycle.ca.gov/recycle/commercial/organics/>.

FOOD SCRAP RECYCLING

Returning organic materials to the soil drastically reduces the environmental impacts of landfills, reduces greenhouse gasses, creates jobs, and helps sustain California's agricultural industry.

CR&R offers a Food Scrap Recycling collection service to businesses. Items that can be placed in a Food Scrap Cart: Food preparation scraps, and table scraps, food soiled paper, plants, flowers, coffee grounds, and much more. To obtain additional information or subscribe to recycling service call CR&R Environmental Services and ask to speak with a Sustainability Specialist for your area.

RECYCLE PROGRAMS

1 MIXED RECYCLING
This program recycles materials such as: cardboard, mixed paper, plastic, aluminum and glass bottles. They may be mixed together and placed in a recycling bin.

2 SOURCE SEPARATED RECYCLING
Your business may generate a large amount of one type of recyclable material, such as cardboard. CR&R can help you determine the best container for your needs based on the quantity and type of material.

3 CONSTRUCTION AND DEMOLITION
With construction and demolition [C&D] debris making up a large percentage of all material entering California landfills, CR&R can help you to divert as much as possible through a combination of source separation and mixed processing. Prior to starting your project, contact CR&R to find out what options will work best for your site. Planning ahead will assist you in diverting as much material as possible, as cost effectively as possible.

4 LEED PROGRAM
LEED, or Leadership in Energy and Environmental Design, is an internationally recognized green building certification system. CR&R is prepared to help you meet your construction based LEED goals. We are flexible enough to work with you on all building types—commercial as well as residential.
