

Sewer Rates Effective 08/01/2016

The City of San Clemente bills all customers on a monthly basis. The monthly bill includes both water and sewer, each billed separately. Sewer Rates include both a fixed service fee and a commodity charge for wastewater discharge.

Sewer Rates

Sewer Fixed Charge

All sewer customers are charged fixed service charges based on the service meter size. The fixed service charges funds infrastructure, maintenance and replacement as well as administrative expenses.

Meter Size	Sewer
Up to 1" <i>(92% of meters in San Clemente)</i>	\$23.82
1.5"	\$78.60
2"	\$126.24
3"	\$262.02
4"	\$404.92
6"	\$793.18

Sewer Commodity Rates

In addition to the fixed sewer service charge, residential customers pay a Sewer Commodity Rate for sewer based on 90% of total water consumption.

Classification	Price Per Unit	Based on Water Consumption
Single Family Residential	\$1.44	90% of Winter Month Average***
Multi Family Residential	\$1.44	90% of current month
Commercial		
Low Strength	\$1.97	90% of current month
Medium Strength	\$2.58	90% of current month
Medium- High Strength	\$4.57	90% of current month
High Strength	\$6.38	90% of current month
Mixed Use	\$2.61	90% of current month

*** Winter Month Average is calculated annually each fall by averaging water usage for October through March. This number becomes the basis for the sewer charge for the next twelve (12) month period. If the winter average results in a fraction, the result shall be rounded to the nearest whole number. If the winter average results in zero (0), the sewer commodity rate shall be based on a City-wide average during the winter months.
