A Quarterly Update of What’s Going on in Division 3

San Clemente – 1st Quarter

OCFA Firefighter Recruit Academy 47

February 18th was the first official day of OCFA Firefighter Recruit Academy 47. Forty-eight recruits will train for 16 weeks. Each morning begins with a physical fitness session to prepare them for the rigorous jobs of firefighting.

The Academy began its second week with all the basic firefighting tools: hose, ladders, fire control, fire behavior, and smoke.

Saving lives is a firefighter’s top priority. At times, they put themselves in dangerous situations to keep you safe. The recruits trained on how to

Electrical Fire Safety

Protect your family and your home by following these electrical safety tips:

- Always plug major appliances directly into wall outlets.
- Unplug small appliances when they are not in use.
- Replace any cracked, damaged, or loose cords on appliances.
- Place lamps on level surfaces, away from things that can burn.
- Never overload wall outlets.
- Insert plugs fully into sockets.
- Insert tamper-resistant electrical outlets if you have young children.
- Extension cords are meant for short-term use only.
- Do not run electrical cords across doorways or under carpets.
- Do not overload power strips.
- Use surge protectors, not power strips, with electrical devices that require a lot of electricity to operate.

Electrical Fire Warning Signs

- Frequent problems with blowing fuses or tripping circuit breakers
- A tingling feeling when you touch an electrical appliance
- Discolored or warm wall outlets
- A burning or rubbery odor coming from an appliance
- Flickering lights
- Sparks from an outlet

Fire Apparatus Engineer Promotions

On January 24th, OCFA held a promotional ceremony for our recently promoted employees, including our 16 new Fire Apparatus Engineers. They went through an eight-week academy where they learned everything about our fire engines and fire trucks, including pumping water to do our hoses, manipulating our articulating ladders, and, of course, safely driving an enormous piece of apparatus. Congratulations to all of our newly promoted employees!
Beach Safety:

**Identify Rip Currents:**
A channel of churning, choppy water. An area having a notable difference in color, parallel to the shoreline. A line of foam, seaweed, or debris moving steadily out to sea. A break in the incoming wave pattern.

**Survive Rip Currents:**
- Remain Calm. Don’t fight the current, swim out of the current by swimming to the side. If you can’t escape, float or tread water. If you need help, call or wave for assistance.

---

**Household Hazardous Waste**

Leftover products that are corrosive, toxic, or can catch fire, react, or explode under certain circumstances are considered household hazardous waste. These products require special care to prevent fire, injury, or pollution of the environment.

**Use and Storage**
- Keep flammable liquids away from heat sources and open flames, such as hot water heaters and fireplaces.
- Don’t smoke while using any type of flammable product, including nail polish, polish remover, alcohol-based hair products, and similar cosmetic items.
- Follow instructions on the labels of all flammable liquids and other hazardous products carefully to prevent accidents or injuries at home.
- Keep hazardous products in their original containers, and never remove labels or instructions.
- Never mix hazardous products. They might react, ignite, or explode when combined.
- Never leave household hazardous products or waste within reach of children or pets.
- Go green! Look for environmentally friendly products or search online for simple recipes using natural ingredients.

**Disposal**
- Never dispose of household hazardous waste in your regular trash. Once in landfills, these products can contaminate groundwater that may become a source of drinking water.
- Never dump household hazardous waste on the ground, down storm drains, or into toilets, drains, or sinks. It can seep into groundwater and waterways, contaminating lakes, the ocean, and local beaches.
- Orange County residents can dispose of household hazardous waste items for FREE at any Orange County House Hazardous Waste Collection Center.

Incident # 006287 – January 16th
At 1117 hours, a TCCR response was dispatched to Camino Del Rio/ Avenida La pata. Truck 59 arrived on scene at 1122 hours with a vehicle down a ravine approximately 200 yards. Truck 59 requested a technical truck for a low angle rescue and Copter 1 for a hoisting operation. Battalion 7 arrived on scene and reported one mild patient at the bottom of the ravine. Truck 59 assumed rescue group and Engine 56 medical group. Copter 1 arrived on scene, inserted a rescuer and hoisted the patient into the aircraft. The Patient was transported via Copter 1 to Mission hospital.

Battalion 6 units from Dana Point, San Clemente, San Juan Capistrano and Rancho Mission Viejo participated in a swift water exercise on February 28th. Crews worked on victim rescue with throw bags.
